

[Slingin' Macros]

Summary

Sling food at hungry customers! Take too long or mess up their order and they'll tell the manager and you'll be fired. There are three minutes left until close.

Core Goals/Player Objectives

The Player must feed as many customers as possible within three minutes without letting them get too close. The Player loses when too many customers have reached the bar without receiving food.

Features

Action

Players can sling food at hungry customers.

Health

The player has three chances to give a customer an order before they are "fired". The player fails and receives a strike when a customer reaches the bar without receiving their order.

UI

Player health is represented by a tip jar, projected tip money (health) is lost when a customer reaches the bar.

Stretch Goals

Food Types

Each customer wants a dish made of combined, create a main dish by placing ingredients into the pocket of the slingshot to be launched! A UI element will hover above the Player with a picture of the main dish to indicate which order a customer would like.

Potentially every customer has a chance to desire a drink with their order, adding an extra sling required to satisfy them.

Power-Ups

Potentially slingshot is an accuracy powerup.

Enemy Behaviors

Customers think about their order before waiting in line.

Throwing

You can throw food from the sockets on the bar that will repopulate after grabbing. All throwable food should be deleted after collision with a customer or after a 5 second window in the scene.

Manager

The Manager yells at you from his office when an angry customer reaches a bar, this indicates that you have lost tip money (health).

Theme

Whacky and bouncy, Worst place to work at

Style and Gameplay Examples

Style and Gameplay Examples go here.

Gameplay examples: Plants vs Zombies (game loop) and Overcooked (plot/setting)

Style examples: Retro Diners (texture colors/patterns), Restaurant/Cafe (layout/props), LooterLand (low polygon count), and ??? (style).
